WEB APIS - CODING QUIZ CHALLENGE

The motivation for this project was to create a coding assessment that includes both multiple-choice questions and interactive coding challenges. I built a timed coding quiz with multiple-choice questions, that runs in the browser and features dynamically updated HTML and CSS powered by JavaScript code.

I learnt about code responsive design, creating Javascript code, the console, algorhythms, linking Javascript to HTML and CSS, dynamic HTML and CSS, Javascript hierarchy, web APIs, Javascript variables and functions, Javascript for loops, arrays and much more.

Are you ready to play?

Plays   High Scores

Question 1 of 5   Score
                                   0

The condition in an if/else statement is enclosed within...

A   Quotes

B   Curly Brackets

C   Parentheses

D   Square Brackets

54

SERVER SIDE APIS - WEATHER DASHBOARD APP

The motivation for this project was to build a weather dashboard that will run in the browser and feature dynamically updated HTML and CSS. The dashboard uses the OpenWeather One Call API to retrieve weather data for cities.

I learnt about using API's to retrieve information, API keys, Javascript functions, event handlers and algorithms, CSS, HTML, local storage, and much more.
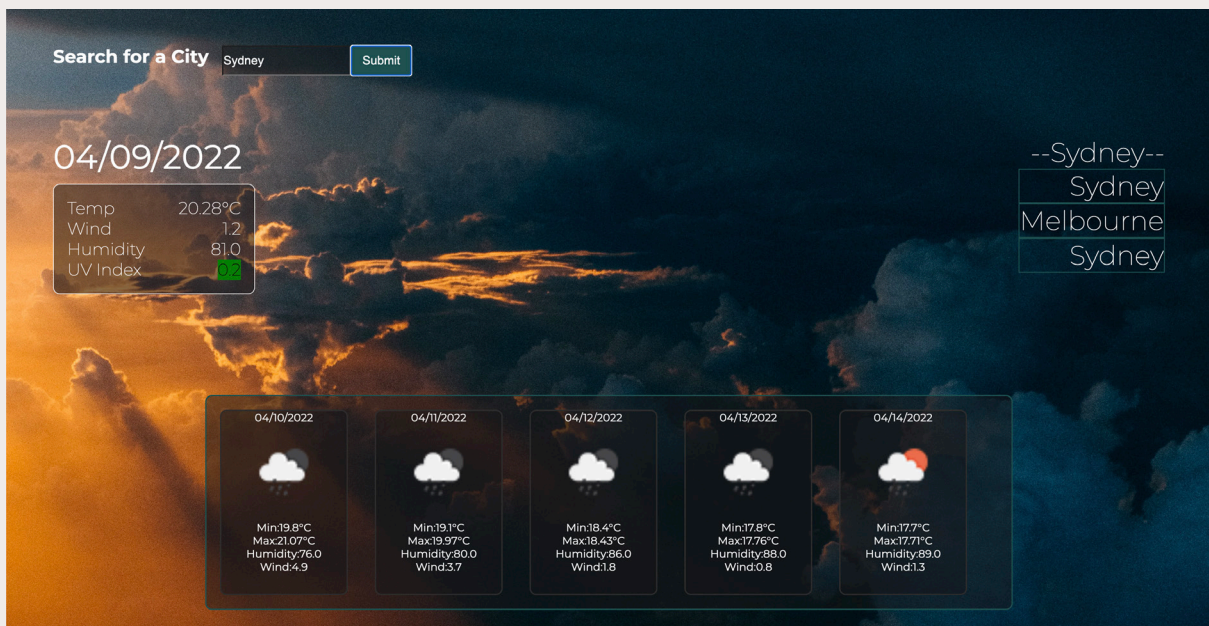

MOOVEE MOVIE SEARCH APP

We made this app to allow users to select and watch trailers of movies that they like. While making the app, we learned to collaborate, and how to work with APIs, working with design libraries (Materialize) and responsive design, GitHub Pull Requests and Projects, Merge Conflicts, the Command Line / Terminal, tickets and issues, DOM traversal and manipulation.
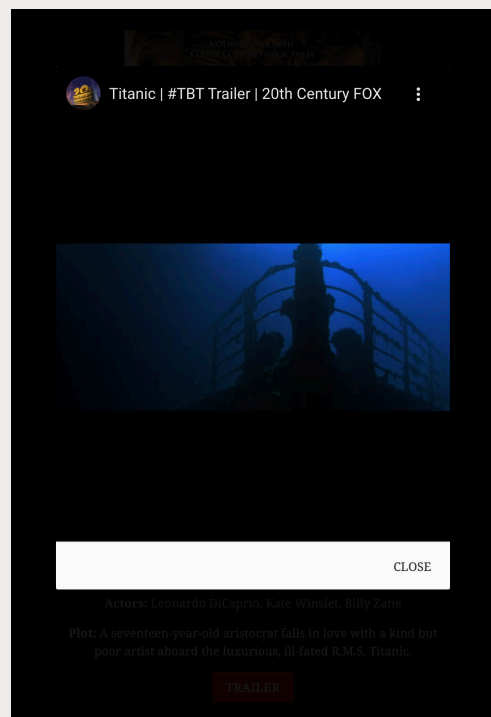

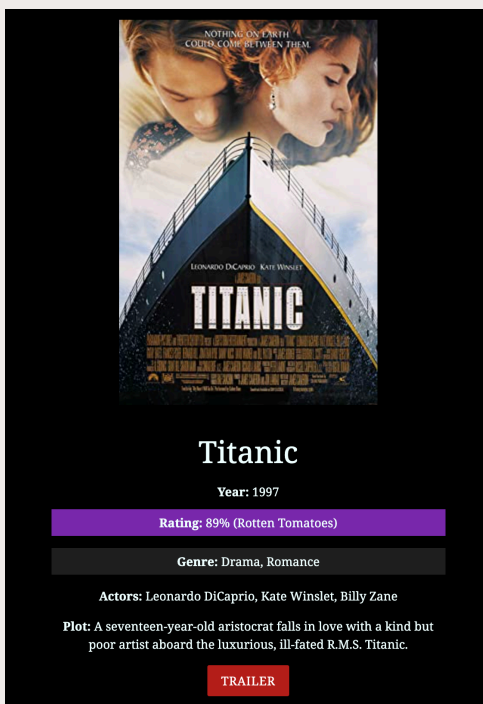

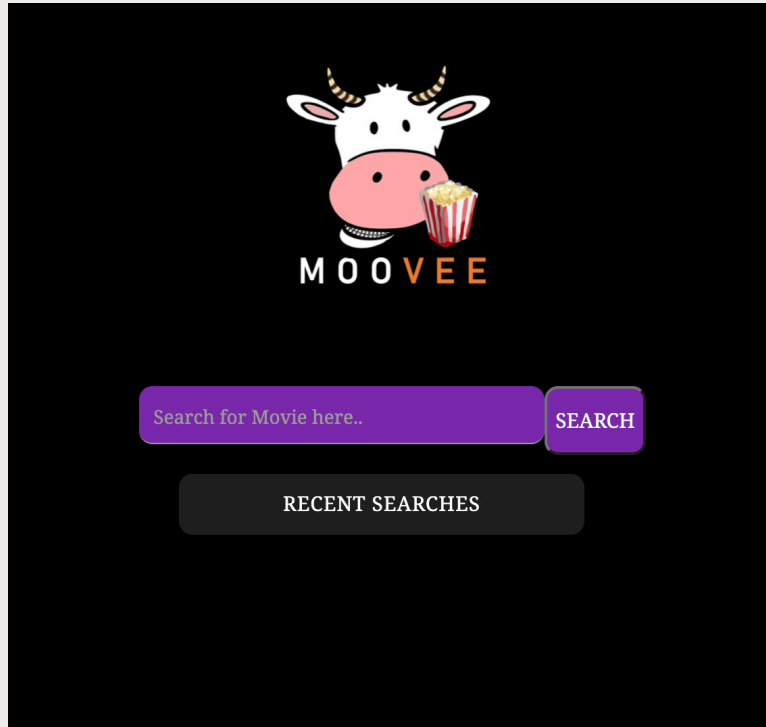

PROJECTHUB CRM APP

An accessible customer relationship management system, which can be used for storing a company's client and project database.

Welcome Will!

Job Number: 001	Budget: $1,000,000.00
Address: 44 Princess Street	Client: James Finley
City: Macksville 2447	Manager: Tim P
State: NSW	Notes:

Project Map
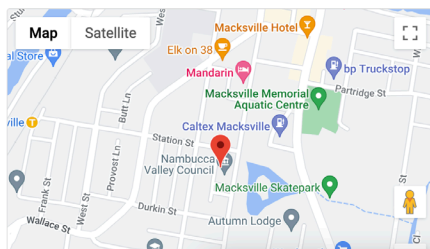

Project Feasibility Info for: Maffra

Median House Price: $385,000.00
Houses Sold (last quarter): 35
5th Percentile Price: $280,000.00
25th Percentile Price: $325,000.00
75th Percentile Price: $432,000.00
95th Percentile Price: $560,000.00

T E C H   B L O G   A P P

The motivation was to build a CMS-style blog site similar to a Wordpress site, where developers can publish their blog posts and comment on other developer's posts as well. I built this site completely from scratch and deployed it to Heroku. The app follows the MVC paradigm in its architectural structure, using Handlebars.js as the templating language, Sequelize as the ORM, and the express-session npm package for authentication.

I learnt about using node js, MySQL, Sequelize, Handlebars.js, express-session npm package, seeding databases, authentication, using schemas and much more.
